ABOUT THE SCHOOL

Faculty of Pharmaceutical Sciences

Nagoya City University Hospital

Graduate School of Medicine

Graduate School of Nursing

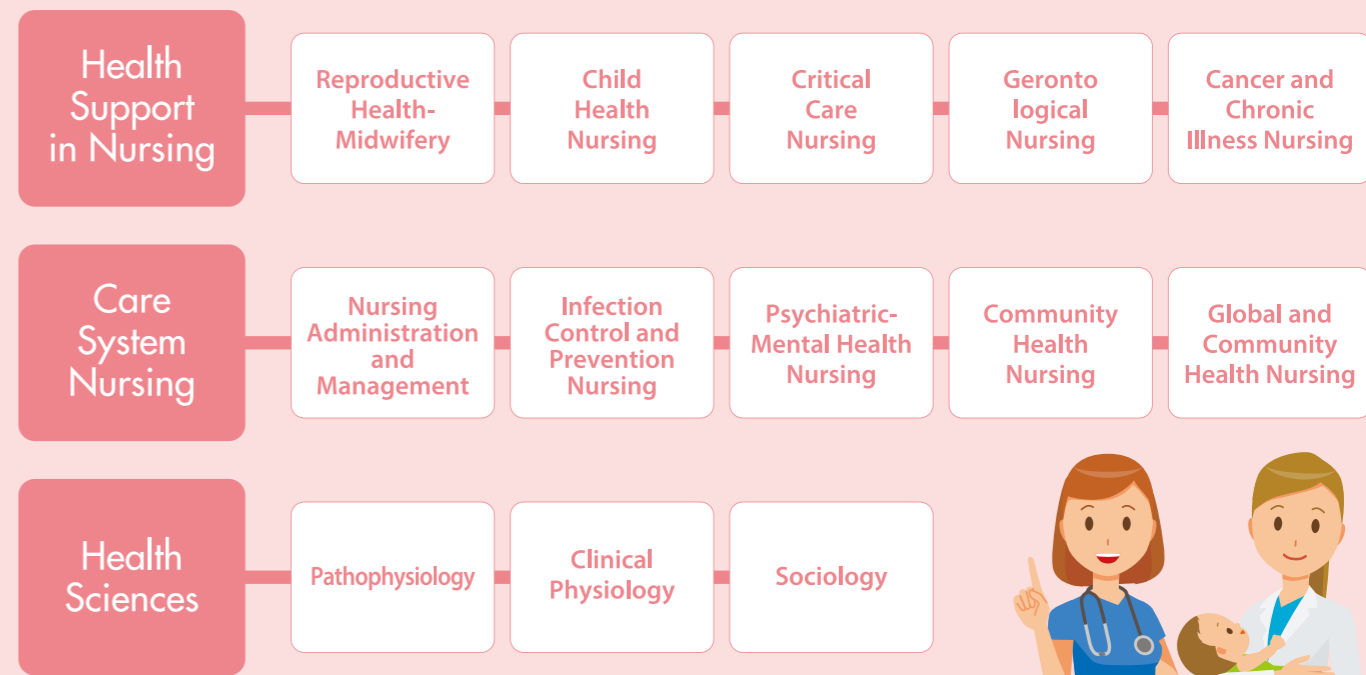

■ The main goal of our education is to nurture nursing professionals who deeply appreciate the human dignity and can contribute to the health promotion, medical care, and welfare of people.

■ There are 80 undergraduate students per academic year, about 40 students in the master's program, and about 20 students in the doctoral program.

■ There are 37 faculty members as of 2021.1.1

We have graduate school of medicine and a graduate school of pharmacy, and also conducts lectures and exercises jointly with the faculties of pharmacy and nursing. You can take a full range of practical training at the university hospital on campus.

AREA of EXPERTISES

UNDERGRADUATE SCHOOL

- During 4 years, the students will demonstrate a steady growth in scholarship and professionalism. The school offers a wide variety of classes led by the faculty members with genuine enthusiasm. The practicum training is an opportunity for the students to learn to work with patients, older people, etc. on a practical basis, which is a fascinating and rewarding experience.
- The graduates are entitled to take the national examinations for clinical nurses and public health nurses, and nearly 100% of them are got qualified. They then obtain positions in a variety of hospitals and other health-related facilities.

ABOUT OUR CLINICAL PRACTICE NETWORK

MASTER'S and DOCTORAL PROGRAMS

The Graduate School of Nursing for the Master's degree was established in 2003, followed by the Doctoral Course created in 2005. It shares a common goal with the undergraduate Nursing School to bring up nursing professionals who well appreciate the human dignity and can contribute to the health promotion, medical care and welfare of the people. The Graduate School offers the day and night classes to increase convenience for the working students.

CAREER

- About 80% of the graduates of the School of Nursing go on to work in hospitals, and about 10 students go on to work as public health nurses in government or companies.
- Every year, 5 to 10 students go on to graduate school to become midwives.
- 80 % of graduate students are employed in teaching posts in educational institutions, while others obtain CNS and are active in clinical settings, or in local administrative agencies such as public health centers. Most graduates of the midwifery course find employment as midwives.
